Colours swatch card

In this swatch card you see our actual fabrics photographed in high resolution and then colour-matched as best possible. This is the most accurate representation of the colours that can be done in a book form short of seeing the products in real life. We hope you find it a useful tool in your daily work.

However, there may be some slight colour variations between the shades, and so we cannot be held responsible for any discrepancies. We hope you understand.

If you are looking at this book on screen, the colours will be much less accurate because of the way monitors display colours.

The PMS (Pantone Matching System) references given under each swatch are the closest match available.

Icons used

There are important symbols used in this colour card. When looking at the swatches, please pay attention to the symbols shown under each colour swatch to check the availability of the colour by

- product type
- product brand
- garment decoration techniques
